

CERAMIC POLISHED SUPERFORGIATA A new finishing for this high-performance wheel

SUPERFORGIATA, the top-of-the-range OZ wheel with iconic appeal for fans of racing style and true performance, is now available in a new high-polished version.

An absolute collector's piece, and the ultimate expression of wheel design and technology, SUPERFORGIATA gains further exclusivity to complement the most sophisticated automobiles when released in "CERAMIC POLISHED" finishing in Spring 2013.

The so-called "mirror" effect is created through the use of a special tumbling process where the wheel surface is smoothed by the abrasive action of ceramic spheres and tetrahedrons.

Once again, OZ goes right to the heart of what sports enthusiasts want -- technical performance, features and aesthetic appeal -- bringing to the table experience gained by OZ TECH LAB technicians in racing, alongside attention to detail and fine finishing touches that mark the genetic heritage of OZ, thanks to 40 years of history and development.

SUPERFORGIATA is available in CENTRAL LOCK and 5 Holes versions, in both 19" and 20" diameters for super cars like: Audi RS4, RS6, R8; BMW M5, M6; Ferrari 430 Scuderia, 458 Italia; McLaren MP4, Gallardo; Nissan GT-R; Porsche 911 Turbo, GT2, GT3, GT3 RS and the new 991.

Like all wheels made by OZ, SUPERFORGIATA is TÜV certified. Always ask your tire dealer for certification of the wheels you are about to purchase, don't settle for less than total safety.

SUPERFORGIATA SPEC SHEET
